TO WHOM IT MAY CONCERN

I own a property at Werombi in N.S.W. where I have a large underground rainwater tank; however I am very conscious of the need to be frugal with fresh water use.

Four years ago, the *D.E.* filter on the swimming pool packed up and I had a sand filter installed. I was rather disappointed with this filter, as the water was not as clean and it needed backwashing once or twice a week.

About 18 months ago, I was advised by Mr. Peter Rabbidge, that replacing the sand filter with "Zelbrite" would be an improvement. This was good advice! The pool is now always sparkling clear & backwashing is only necessary about monthly, saving a considerable amount of water.

I have no reservations about recommending this product for use in a pool filter.

Signed

R.H.J.Hyne
